

HOFPI®
The integrated pentry in
hospitals

 **Vauconsant**

HOFPI® is the essential counterpart to the main kitchen in hospitals. It ensures the best conditions regarding hygiene and conviviality: breakfast service, postponed service for patients having an examination, light meals. The integrated pantry HOFPI® contributes to a modern and welcoming image of an efficient service.

HOFPI® is made of two complementary modules: "forward motion" and "service".

Food safety

Respect the most demanding norms

Put on bases and fixed to stainless steel panels, HOFPI® ensures the best guarantees concerning hygiene and cleaning compared to the traditional solutions (built + wood)

- The modules are perfectly linked to one another and a coved tile links the modules and the ground
- The modules are manufactured with inner rounded edges (easy cleaning)
- The drawers are on telescopic slides and are equipped with GN containers, which are dishwasher-proof
- The top of the modules is sloping, so that no items which are not belonging to the service can be put down there
- The worktable and the upstand are made of one piece with no interstice

A practical and rational space

The storage spaces, the immediate accessibility to the products: everything has been studied to limit efforts, moves and handling.

- The worktable is fully clear and lighted up
- The cupboards have neutral and refrigerated drawers
- The appliances can be integrated (or put on shelf: microwave)
- Glasses and cups are stored in dish rack (no handling)

Drawers on telescopic slides are equipped with GN containers, which are dishwasher-proof

Inner rounded edges (easy cleaning)

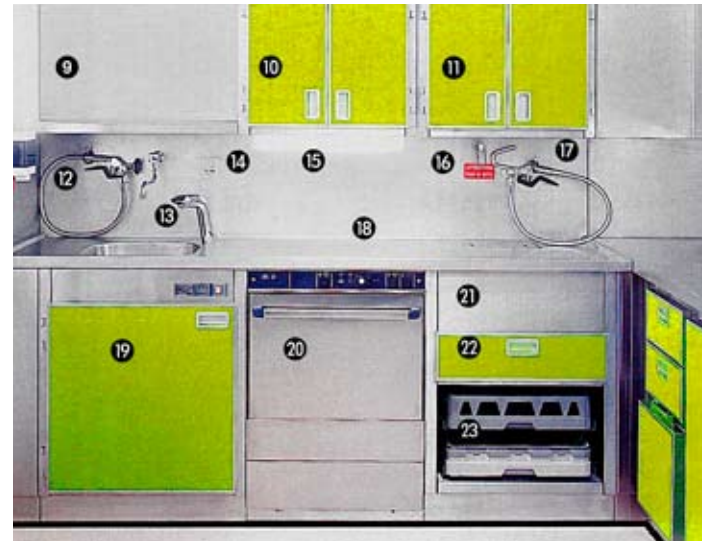

Special for intensive use

The Vauconsant modules are known for their practicality and their sustain ability. The construction is made in stainless steel AISI 304 which guarantees its long life.

Service Module

1. Cupboard to store food goods
2. Shelf for microwave – built-in plug
3. Lighting of the worktable by fluorescent tube – 2 built-in plugs in the upstand
4. Worktable, integrated upstand, with 4 front edges
5. Drawer to store pastries, continental toasts...
6. Drawer to store bread, including special diet bread
7. Refrigerated drawer for juice cartons or milk bottles, dairy products
8. Professional fridge designed for GN. Regulated temperature between +1°C and +3°C, digital display, capacity:
 - 5 meal trays, GN 1/1
 - Butter and extras

"Forward motion" module

9. Storage shelf: trays, isotherm containers
10. Cupboard to store dishes
11. Cupboard to store food
12. Spray feature with a flexible and a mixing valver
13. Tab with electronic detection – sink 400 x 400 x 200 mm
14. Soap dispenser
15. Lighting of the worktable
16. Hot water dispenser, +85°C, for the freeze-dried products
17. Cold water dispenser
18. Worktable with integrated upstand and 4 edges to prevent from streaming
19. Cupboard to store detergents – Incorporation of the hot water tank (+85°C), softener
20. Room for the dishwasher et GN1/1 trays
21. Fire-up of the bottles – hot ventilated-air – drain with control on the front
22. Drawer to store cutlery and cookware
23. Open storage space for cups and glasses racks

HOFPI®, a modular range

Whatever the set-up of the place, the number of patients of the specialisation of the service, the HOFPI® modules can easily be integrated in your room, either in line, with an angle or face-to-face. Single water – electricity connection. Pre-connection made in factory. The conception of the HOFPI® enables an easy settlement. The maintenance is highly reduced.
